Part 2:

I think the reason why I would make a good game developer is because I have a passion for video games and the community that it involves it! I may not be the strongest person when it comes to game development but I have a passion and a drive to work in this field and love the creation process of games. My Idea for my trailer/show of my game is to create either a google document or a slide show to show off my game idea and the creation process!
